Web > Web Server

Default HTTP web server
A built-in HTTP Web Server is provided with TSplus
However, you can use a different one (IIS or Apache for example).
 Use the built-in HTTP web server
 Use a different HTTP web server
When using IIS or Apache, its HTTP port number must be set to 81.
(Tunneling forwards this 81 port into the public HTTP port 80)

Change the Web Server root path
You can change the Web Server default root path.
The current Web Server root path is:
C:\Program Files (x86)\TSplus\Clients\www Select a new Web Server root path

Web servers options
Change the HTTP/HTTPS port numbers
Will not change IIS or Apache port settings
HTTP: 33389
HTTPS: 443

Save and Restart Web Server
